

GMaps Plugin Enterprise for Xcelsius 2008

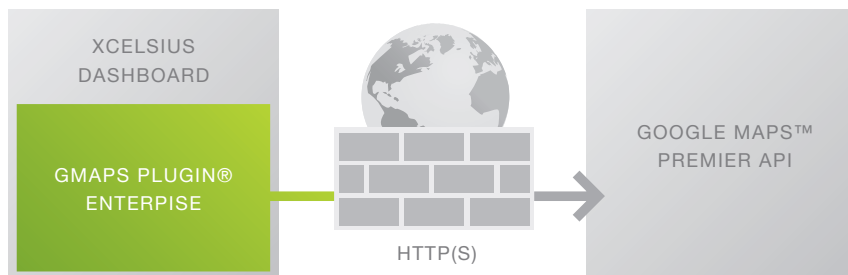

Point and click integration of Google Maps™ into business intelligence dashboards...

SOLUTION DETAILS

Centigon Solutions GMaps Plugin component for Xcelsius® 2008 couples interactive geographic analysis with business intelligence dashboards. Drag and drop GMaps Plugin into SAP® BusinessObjects™ best of breed dashboard development environment, Xcelsius, and then configure alerting and analytic capabilities with point and click simplicity. Providing a seamless integration of Google Maps' Flash API into Xcelsius, GMaps Plugin provides maximum flexibility to align geographic analysis with any business intelligence dashboard project.

GMaps Plugin Enterprise connects directly to the Google Maps Premier API, allowing Xcelsius designers to incorporate Google Maps into enterprise dashboards without writing a single line of code. Build and deploy dashboards to secured web sites, portal environments, or anywhere else behind your corporate firewall.

BUSINESS BENEFITS

GMaps Plugin transforms a Google Map enabled component into an interactive geo-analysis tool for dashboards, empowering businesses to utilize geographic data for identifying problems and seeking new opportunities like never before!

Extending complete control over geographic locations, labels, values, colors, and marker icon styles, GMaps Plugin can be incorporated into any business intelligence dashboard.

Regardless of the end user's profile, the familiarity of Google Maps enables businesses to deploy guided analysis at any level of an organization from the business analyst, all the way up to C-level executives.

Download a free trial from centigonsolutions.com today and see for yourself how easily you can deploy Google Maps enabled dashboards today!
